

RWAlpha Index Prime Tokenized Fund

Product Whitepaper

Umbrella Fund	RWAlpha Matrix Fund SPC
Sub-Fund Name	RWAlpha Index Prime Fund SP
Domicile	Cayman Islands
Regulator	Cayman Islands Monetary Authority (CIMA)
CIMA Reg. No.	2275350
Fund Manager	KEN Asset Management Limited
Token Architecture	AI/AIX (Permissioned) + bAI/bAIX (Permissionless)
Underlying Assets	Structured ETFs

01

Dual-Token Architecture Overview

To meet strict financial compliance requirements while maximizing liquidity and composability in the Web3 ecosystem, RWAlpha has innovatively designed a **Dual-Token Architecture**. This whitepaper is divided into two main parts:

Part 1: Regulated Fund Layer (RWAlpha Index Prime Fund SP)

The first segregated portfolio established by RWAlpha Matrix Fund SPC, regulated by the Cayman Islands Monetary Authority (CIMA). This layer accepts USDC/USDT subscriptions, invests in traditional financial assets, and issues **AI / AIX (Information Tokens)**. These tokens are issued exclusively to KYC-verified Eligible Investors and can only be transferred between whitelisted clients.

Part 2: Permissionless Token Layer

Issued by RWAlpha Labs (BVI) providing a decentralized wrapping protocol. Eligible Investors can wrap their AI/AIX 1:1 into **bAI / bAIX (Permissionless Tokens)**. bAI/bAIX feature full permissionless characteristics, allowing free circulation, trading, and integration on-chain.

Part 1: Regulated Fund Layer (RWAlpha Index Prime Fund SP)

1.1 Fund Information

RWAlpha Index Prime Fund SP is the first sub-fund of RWAlpha Matrix Fund SPC — one of the first tokenised mutual funds registered under the Cayman Islands **Mutual Funds Act (2025), Section 4(3)** (Mutual Fund – Registered, CIMA Reg. No.: 2275350, Company Reg. No.: 427452, Registration Date: 16 June 2026).

Field	Details
Regulator	Cayman Islands Monetary Authority (CIMA)
Fund Manager	KEN Asset Management Limited (BVI)
Fund Admin	ASCENT Fund Services (Singapore) Pte. Ltd.
Token Type	AI / AIX (Information Token, Permissioned)
Investor Eligibility	KYC/AML-verified Eligible Investors only. Minimum initial subscription: US\$100,000.
Transfer Restrictions	Fund Tokens are non-transferable at launch. Future transfers, if permitted, are restricted to whitelisted addresses and require Board approval, updated on the Register of Members.
Legal Title	Fund Tokens serve solely as on-chain evidence of legal ownership of Participating Shares. The Register of Members maintained by the Fund Admin is the definitive record of legal ownership.

Accepted Currency	USDC / USDT
Initial Issue Price	US\$1,000 per share (subsequent subscriptions priced at NAV). Minimum additional subscription: US\$1,000.
Financial Year	Ending 31 December each year; first financial year ends 31 December 2026.

02

Underlying Asset Allocation (Regulated Layer)

RWAlpha Index Prime Fund SP offers two core product portfolios corresponding to the AI and AIX tokens respectively. Each product is designed for different risk profiles and return objectives, with all underlying assets backed by strictly regulated US-listed structured ETFs.

2.1 AI Product: Structured Yield

AI is a structured investment portfolio focused on AI tech yields, providing stable weekly distributions through Nasdaq 100 and NVIDIA options strategies.

Underlying Asset Allocation: QQQI 75% + NVDY 25%.

QQQI — NEOS Nasdaq-100® High Income ETF (75%)

Parameter	Details
Issuer	NEOS Investments
Inception Date	29 January 2024
Options Strategy	Actively managed data-driven covered calls (NDX index options, Section 1256)
Distribution Frequency	Monthly (75% weight in AI)
Expense Ratio	0.68% p.a.
YTD Return (2026)	+8.51%
1-Year Return	+19.71%
AUM (as of Aug 2026)	~US\$13.1 Billion

NVDY — YieldMax™ NVDA Option Income Strategy ETF (25%)

Parameter	Details
Issuer	YieldMax ETFs (Tidal Financial Group)
Inception Date	10 May 2023
Options Strategy	Actively managed weekly NVDA call option spread

Distribution Frequency	Weekly (25% weight in AI)
Expense Ratio	1.09% p.a.
Annualised Yield	34.01%
YTD Return (2026)	+10.18%
1-Year Return	+20.99%
AUM (as of Aug 2026)	~US\$1.37 Billion

2.2 AIX Product: Enhanced Structured Yield

AIX is an enhanced version that overlays the AI storage chip supercycle growth and broad tech exposure on top of weekly options yields, building a 5-asset portfolio pursuing both income and capital appreciation.

Underlying Asset Allocation: NVDY 30% + QQQI 20% + DRAM 20% + VGT 20% + SGOV 10%.

NVDY — YieldMax™ NVDA Option Income Strategy ETF (30%)

Parameter	Details
Issuer	YieldMax ETFs (Tidal Financial Group)
Inception Date	10 May 2023
Options Strategy	Actively managed weekly NVDA call option spread
Distribution Frequency	Weekly (30% weight in AIX, core yield source)
Expense Ratio	1.09% p.a.
Annualised Yield	34.01%
YTD Return (2026)	+10.18%
1-Year Return	+20.99%
AUM (as of Aug 2026)	~US\$1.37 Billion

QQQI — NEOS Nasdaq-100® High Income ETF (20%)

Parameter	Details
Issuer	NEOS Investments
Inception Date	29 January 2024
Options Strategy	Actively managed data-driven covered calls (NDX index options, Section 1256)
Distribution Frequency	Monthly (20% weight in AIX)
Expense Ratio	0.68% p.a.

YTD Return (2026)	+8.51%
1-Year Return	+19.71%
AUM (as of Aug 2026)	~US\$13.1 Billion

DRAM — Roundhill Memory ETF (20%)

Parameter	Details
Issuer	Roundhill Investments
Inception Date	1 April 2026
Product Focus	World's first pure-play memory chip ETF (SK Hynix, Micron, Samsung)
Options Strategy	No options, pure equity long (memory chip sector beta)
Distribution Frequency	Non-distributing (pure capital appreciation, 20% weight in AIX)
Expense Ratio	0.65% p.a.
YTD Return (2026)	+103.30%
AUM (as of Aug 2026)	~US\$25.9 Billion

VGT — Vanguard Information Technology ETF (20%)

Parameter	Details
Issuer	Vanguard
Inception Date	26 January 2004
Tracking Index	MSCI US Investable Market Information Technology 25/50 Index
Distribution Frequency	Quarterly (20% weight in AIX, providing broad tech beta)
Expense Ratio	0.09% p.a.
YTD Return (2026)	+22.47%
1-Year Return	+37.19%
3-Year Return	+28.54%
AUM (as of Aug 2026)	~US\$169.3 Billion

SGOV — iShares 0-3 Month Treasury Bond ETF (10%)

Parameter	Details
Issuer	BlackRock / iShares

Inception Date	26 May 2020
Asset Class	Short-duration US Treasury bonds (0-3 months maturity)
Distribution Frequency	Monthly (10% weight in AIX, risk-diversifying treasury buffer)
Expense Ratio	0.09% p.a.
Annualised Yield	3.85%
YTD Return (2026)	+2.13%
1-Year Return	+3.85%
AUM (as of Aug 2026)	~US\$95.9 Billion

03

User Returns & Asset Custody

For holders of AI / AIX tokens, total returns consist of two components:

3.1 NAV Growth (Capital Appreciation)

Market price fluctuations of the underlying ETF portfolio directly reflect on the token NAV. The number of AI / AIX tokens held by the user remains unchanged, but the NAV (Net Asset Value) per token rises and falls with the underlying assets. Users can view total assets and unrealised P&L; in real-time on the platform's 'Holdings' page.

Underlying Asset Holdings: Underlying ETFs are held in a brokerage account opened by RWAlpha Index Prime Fund SP at Moomoo (SG) (via Capbridge), utilizing Fireblocks institutional-grade MPC custody, mapping physical assets to on-chain tokens 1:1.

3.2 Weekly Distributions

After the underlying ETFs (NVDY weekly, SGOV / QQQI monthly) settle options yields and dividend income, the Fund converts USD yields into USDT via FOMO Pay (Singapore-licensed MPI institution), which is then automatically distributed to each whitelisted user's yield account proportionally via smart contracts.

User Operation: Upon receipt of yield, users can view withdrawable amounts and yield history on the platform's 'Yield' page, and can click 'Withdraw' at any time to extract USDT to their wallets.

Settlement Time: T+1 to the user's connected wallet after submitting a withdrawal request.

Distribution Policy: Actual distributions are subject to Board declaration, with frequency referencing the underlying assets' distribution schedule.

3.3 Asset Security & Custody Architecture

Smart contracts are solely responsible for token minting/burning/accounting and do not custody any funds. User USDT entering the contract is immediately transferred to a Fireblocks Vault, achieving complete isolation between funds and contracts. Combined with 3-wallet isolation (Inbound / Outbound / Yield) and a 3-layer approval chain (Maker 2FA → Checker 2FA → Fireblocks 2/2 Multi-sig Broadcast), client asset security is maximally guaranteed.

04

Subscription, Redemption & Yield Flow (Eligible Investors Only)

4.1 Subscription (Minting AI/AIX)

Whitelisted user deposits USDC/USDT → Fund converts via FOMO Pay → Purchases underlying assets via Moomoo → Mints equivalent AI/AIX tokens on-chain → Sends tokens to the user's whitelisted Web3 wallet.

Settlement Time: Approximately T+1 business days (T+3 for weekend submissions).

4.2 Redemption

User submits redemption request, smart contract locks tokens → Sells corresponding underlying assets via Moomoo → Fund converts to stablecoins via FOMO Pay → USDC/USDT sent to user wallet, tokens burned simultaneously.

Settlement Time: Approximately T+5 business days (T+7 for weekend submissions).

4.3 Income Distribution

Underlying assets distribute income → Moomoo transfers income to fund account → Fund converts income to USDC/USDT via FOMO Pay → Smart contract calculates each whitelisted user's pro-rata share → Contract automatically sends distribution to user accounts.

Settlement Time: T+1 to the user's connected wallet after submitting a withdrawal request.

Distribution Policy: The Fund does not pre-commit to any distribution in principle. Actual distributions are subject to Board declaration, with frequency referencing the underlying assets' distribution schedule.

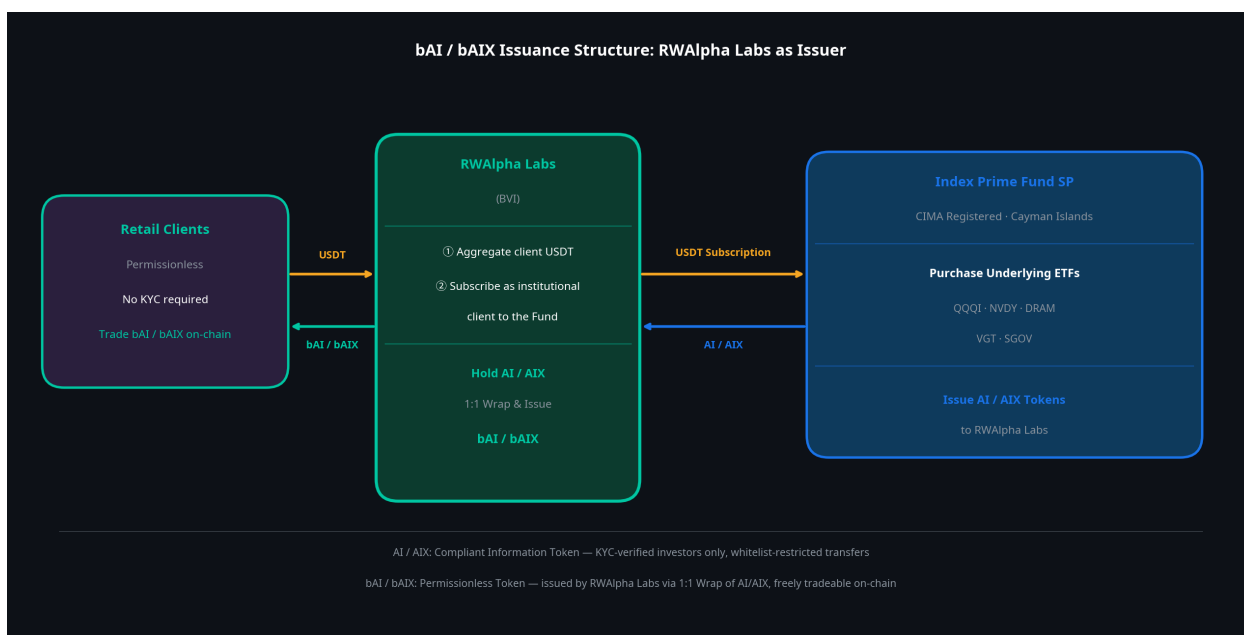

Part 2: Permissionless Token Layer

2.1 Permissionless Token Issuance Info

Issuer: RWAlpha Labs (BVI)

Token Type: bAI / bAIX (Permissionless Token)

Transfer Rules: No KYC required, no whitelist restrictions, freely transferable and tradable between any addresses on-chain.

2.2 Wrap Protocol Mechanism

To break the liquidity silo of permissioned tokens (AI/AIX), RWAlpha Labs has deployed a decentralized Wrap protocol:

1:1 Pegged Minting: Eligible Investors holding AI/AIX can deposit them into the Wrap smart contract. The contract will automatically mint an equivalent amount of bAI/bAIX and send them to the designated address. The underlying AI/AIX are securely locked in the contract as 100% backing for the value of bAI/bAIX.

Yield Pass-Through: Yields (USDC/USDT) generated by the underlying AI/AIX will be received by the Wrap contract and automatically distributed to current bAI/bAIX holders proportionally, achieving lossless yield pass-through.

On-chain Composability: As standard ERC-20 tokens, bAI/bAIX can seamlessly integrate with DEXs (e.g., Uniswap), lending protocols (e.g., Aave), and other on-chain yield aggregators, greatly unlocking the capital efficiency of RWA assets.

Unwrap: Only Eligible Investor addresses on the whitelist can burn bAI/bAIX to retrieve the corresponding AI/AIX, and subsequently initiate fiat redemptions with the Fund.

05

Smart Contract Addresses

AI / AIX tokens have been deployed on BNB Chain (Binance Smart Chain). bAI / bAIX have been deployed on the BSC mainnet. Investors may audit the contracts in real time via BscScan.

Token	Type / Network	Smart Contract Address
AI	Information Token / BNB Chain	0x9ae2ABa4e18CcFe5323d01b61e879aC15a547e5

06

Compliance & Institutional Framework

To ensure the overall security of both the regulated fund layer and the permissionless token layer, RWAlpha has established deep partnerships with world-leading legal, audit, custody, and financial service institutions:

Role	Partner	Description
Fund Manager	KEN Asset Management Limited	BVI FSC Approved Fund Manager (Certificate No. IBR/AIM/26/2711, issued 21 July 2026). Responsible for fund investment decisions and asset management.
Fund Admin	ASCENT Fund Services (Singapore)	Responsible for maintaining the Register of Members, processing subscription/redemption requests, and NAV calculation.
Legal Counsel	Ogier	Leading offshore law firm in the Cayman Islands, providing legal support for fund establishment and compliance operations.

Fund Auditor	Deloitte	One of the Big Four accounting firms, responsible for the fund's financial audit, ensuring authentic and transparent financial data.
Fiat Settlement	FOMO Pay	Singapore's first MPI licence holder; shareholders include Singapore Exchange (SGX). Provides compliant cross-border settlement support.
Prime Broker	Capbridge (FOMO Group) → Moomoo	Underlying ETF assets are held in a Moomoo (SG) brokerage account opened via Capbridge, responsible for executing exchange-traded transactions and managing underlying asset positions.
Digital Asset Custody	Fireblocks	Provides MPC institutional-grade secure custody and asset transfer policy controls to mitigate systemic operational risk.
Tokenisation Protocol	DMZ Finance	Underlying tokenisation technology partner; 2025 BNB Chain MVB 10 member.
Smart Contract Audit (AI/AIX)	Certik	AI/AIX token contract audit. Report: https://skynet.certik.com/projects/dmz-finance
Smart Contract Audit (bAI/bAIX)	SlowMist	bAI/bAIX Wrap contract audit. Report: https://github.com/slowmist/Knowledge-Base/blob/master/open-report-V2/smart-contract/RWAlpha%20-%20SlowMist%20Audit%20Report.pdf

07

Fee Structure

Token Category	Management Fee	Subscription Fee	Redemption Fee
AI / AIX	2% p.a.	Up to 0.2% (currently waived)	Currently waived
bAI / bAIX	Borne by underlying AI/AIX	Currently waived	Currently waived

08

Risk Factors

Risk Factor	Description
-------------	-------------

Underlying Asset & Market Risk	The portfolio is highly concentrated in specific technology targets and options strategies. Significant price fluctuations in underlying assets will directly impact token NAV. Risk of principal loss exists even under extreme market conditions.
Dual-Token Circulation Risk	The value of bAI/bAIX relies entirely on the mapping of underlying AI/AIX. If the Wrap protocol malfunctions or liquidity dries up, it may cause bAI/bAIX prices to de-peg.
Smart Contract & Tech Risk	Although the contract code has been audited, inherent blockchain vulnerabilities, hacking attacks, and other technical risks cannot be entirely eliminated.
Compliance & Regulatory Risk	Subject to dynamic changes in global regulatory policies, access restrictions by Cayman CIMA or other jurisdictions may be adjusted in real-time based on compliance strategies, affecting token issuance and redemption.
