

RWAlpha Index Prime Tokenized Fund

Product Whitepaper

Umbrella Fund	RWAlpha Matrix Fund SPC
Sub-Fund	Index Prime Fund SP
Domicile	Cayman Islands
Regulator	Cayman Islands Monetary Authority (CIMA)
CIMA Reg. No.	2275350
Issuer	Index Prime Fund SP
Investment Mgr.	KEN Asset Management Limited
Token System	AI / AIX (Information Token)
Underlying	Structured ETF

01

Fund Overview

1.1 Fund Information

Index Prime Fund SP is the first sub-fund of RWAlpha Matrix Fund SPC — one of the first tokenised mutual funds registered under the Cayman Islands **Mutual Funds Act (2025), Section 4(3)** (Mutual Fund – Registered, CIMA Reg. No.: 2275350, Company Reg. No.: 427452, Registration Date: 16 June 2026).

Issuer: Index Prime Fund SP

Regulator: Cayman Islands Monetary Authority (CIMA)

Investment Manager: KEN Asset Management Limited (BVI)

Administrator: ASCENT Fund Services (Singapore) Pte. Ltd.

Technical Service Provider: RWAlpha Global Limited (Hong Kong)

Token Type: AI / AIX — Information Token (Permissioned)

Investor Eligibility: KYC/AML-verified Eligible Investors only. Minimum initial subscription: US\$100,000.

Transfer Restrictions: Fund Tokens are **non-transferable at launch**. Future transfers, if permitted, are restricted to whitelisted addresses and require Board approval. The Administrator must update the Register of Members accordingly.

Legal Title: Fund Tokens serve solely as on-chain evidence of legal ownership of the corresponding Participating Shares. The **Register of Members** maintained by the Administrator is the definitive record of legal ownership.

Accepted Currency: USDC / USDT

Initial Issue Price: US\$1,000 per share (subsequent subscriptions priced at NAV). Minimum additional subscription: US\$1,000.

Financial Year: Ending 31 December each year; first financial year ends 31 December 2026.

02

Underlying Asset Allocation

Index Prime Fund SP offers two core product portfolios corresponding to the AI and AIX tokens respectively. Each product is designed for different risk profiles and return objectives, with all underlying assets backed by strictly regulated US-listed structured ETFs.

2.1 rAI — AI Tech High-Yield Portfolio

Strategy: Nasdaq 100 + NVIDIA Options — weekly stable income distribution. Net Dividend Yield: 13.14% | Net Total Return (TTM): +17.2% | Underlying AUM: US\$13.1B

ETF	Allocation	Description	Annual Yield (TTM)
QQQI	75%	Nasdaq-100 Covered Call ETF — weekly income	~13%
NVDY	25%	NVIDIA Covered Call ETF — enhanced yield	~61%

2.2 rAIX — AI Max Enhanced Portfolio

Strategy: Options weekly income + AI storage supercycle + broad tech growth. Net Dividend Yield: 10% | Net Total Return (TTM): +37.1% | Underlying AUM: US\$286.2B

ETF	Allocation	Description	Annual Yield (TTM)
NVDY	30%	NVIDIA Covered Call ETF — high yield engine	~61%
QQQI	20%	Nasdaq-100 Covered Call ETF — weekly income	~13%
DRAM	20%	AI memory storage supercycle ETF	~N/A
VGT	20%	Vanguard Information Technology ETF — broad tech	~N/A
SGOV	10%	iShares 0-3 Month Treasury Bond ETF — capital buffer	~5%

03

Asset Custody & Tokenisation Architecture

The fund employs a dual-vault architecture with a zero-balance smart contract design: smart contracts manage token minting, burning, and accounting only — no client funds are held within the contract. All investor USDT is immediately transferred to Fireblocks Vault upon receipt, ensuring complete segregation of funds from contracts.

3.1 Principal Vault

- Function:** Exclusively holds underlying ETF positions corresponding to the base asset value of tokens.
- Proof of Ownership:** Underlying assets are held by Index Prime Fund SP in a brokerage account at Moomoo (SG), opened via Capbridge.
- Custody & Transparency:** On-chain mapped assets are custodied using Fireblocks institutional-grade MPC technology, ensuring a 1:1 mapping between physical assets and digital tokens.

3.2 Yield Vault

- Function:** Receives dividends and options premium income generated by underlying assets.
- Fiat Conversion:** FOMO Pay (Singapore licensed MPI) converts USD dividends into USDT for settlement.
- Distribution Mechanism:** Executed automatically via smart contract; yield is distributed periodically to token holders in stablecoins (USDT).

3.3 Core Tokenisation Engine

The tokenisation engine implements a three-wallet segregation model (Inbound / Outbound / Yield) combined with a three-tier approval chain (Maker 2FA → Checker 2FA → Fireblocks 2/2 multi-sig broadcast), maximising the security of client assets.

04

Subscription, Redemption & Distribution

4.1 Subscription (Minting AI/AIX)

Whitelisted investor deposits USDC/USDT → Fund converts via FOMO Pay → Purchases underlying assets via Moomoo → Mints equivalent AI/AIX tokens on-chain → Tokens delivered to investor's whitelisted Web3 wallet.

- Settlement:** Approximately T+1 business day (T+3 for weekend submissions).
- Subscription Deadline:** 17:00 (UTC+8) two business days prior to the subscription date.

4.2 Redemption

Investor submits redemption request; smart contract locks tokens → Fund sells corresponding underlying assets via Moomoo → Converts proceeds to stablecoins via FOMO Pay → USDC/USDT sent to investor's wallet; tokens burned.

- Settlement:** Approximately T+5 business days (T+7 for weekend submissions).

4.3 Income Distribution

Underlying assets generate income → Moomoo transfers income to fund account → Fund converts to USDC/USDT via FOMO Pay → Smart contract calculates each whitelisted investor's pro-rata share → Contract automatically distributes to investor accounts.

- Settlement:** T+1 after investor submits withdrawal request.
- Distribution Policy:** The Fund does not pre-commit to any distribution. Actual distributions are declared at the Board's discretion, with reference to the income schedule of underlying assets.

05

Smart Contract Addresses

AI / AIX tokens have been deployed on BNB Chain (Binance Smart Chain). Investors may audit the contracts in real time via BscScan.

Token	Type / Network	Smart Contract Address
AI	Information Token / BNB Chain	0x9ae2ABa4e18CcFe5323d01b61e879aC15a547e5
AIX	Information Token / BNB Chain	0xFE1bdea75202211c2a67992CD75b743B57A20A38

06

Compliance & Institutional Framework

RWAlpha has established deep partnerships with world-leading legal, audit, custody, and financial service institutions to ensure the integrity of both the regulated fund layer and the permissionless token layer:

Role	Partner	Description
Investment Manager	KEN Asset Management Limited	BVI-registered; applying for BVI FSC Approved Manager status. Responsible for fund investment decisions and asset management.
Administrator	ASCENT Fund Services (Singapore)	Maintains the Register of Members, processes subscription/redemption requests, and calculates NAV.
Tech Service Provider	RWAlpha Global Limited	Hong Kong-registered. Responsible for tokenisation technology, including Fund Token minting and burning.
Legal Counsel	Ogier	Leading offshore law firm in the Cayman Islands, providing legal support for fund establishment and compliance operations.
Fund Auditor	Deloitte	Big Four accounting firm responsible for the fund's financial audit, ensuring accuracy and transparency of financial data.
Fiat Settlement	FOMO Pay	Singapore's first MPI licence holder; shareholders include Singapore Exchange (SGX). Provides compliant cross-border settlement.
Prime Broker	Moomoo (SG) via Capbridge	Executes exchange-traded transactions and manages underlying asset positions.
Digital Asset Custody	Fireblocks	Provides MPC institutional-grade custody and asset transfer policy controls to mitigate systemic operational risk.
Tokenisation Protocol	DMZ Finance	Underlying tokenisation technology partner; BNB Chain MVB Season 10 member (2025).
Smart Contract Audit	CertiK	Leading blockchain security firm; conducted a comprehensive security audit of the fund's smart contracts.

07

Fee Structure

Token	Management Fee	Subscription Fee	Redemption Fee
AI / AIX	2.0% p.a.	Up to 0.2% (currently waived)	Currently waived

08

Risk Factors

Risk Factor	Description
Underlying Asset & Market Risk	The portfolio is highly concentrated in specific technology securities and options strategies. Significant price movements in underlying assets will directly impact token NAV. Risk of principal loss exists even under extreme market conditions.
Smart Contract & Technology Risk	Although contract code has been audited, inherent blockchain vulnerabilities, hacking, and other technical risks cannot be entirely eliminated.
Regulatory & Compliance Risk	Subject to evolving global regulatory policies, CIMA or other jurisdictions may impose access restrictions that could affect token issuance and redemption in accordance with compliance requirements.
Liquidity Risk	Underlying ETFs may face insufficient liquidity under extreme market conditions, affecting the processing time and cost of redemption requests.
