

结构化 RWA Product矩阵

rAI / rAIX / rSTR

综合Product白皮书

发行人	RWAlpha (Onchain GP Limited, BVI)
Product线	rAI / rAIX / rSTR
底层资产类型	Structured ETF / Preferred Stock
技术标准	BNB Chain / Mantle Network
发行日期	2026 年 5 月

01

RWAlpha 结构化Product矩阵概览

RWAlpha 致力于通过区块链技术将传统金融市场中的优质资产进行代币化，为 Web3 投资者提供安全、透明、高效的链上收益解决方案。本白皮书涵盖了 RWAlpha 发行的三款核心结构化 RWA Product：rAI、rAIX 和 rSTR。每款Product均针对不同的风险偏好和收益目标进行设计，底层资产均由受严格监管的传统金融工具支持。

1.1 rAI：结构化收益型 RWA 代币

rAI is a structured yield RWA investment product designed to convert the high volatility of tech stocks into continuous cash flow, providing robust and high dividend payouts.

Underlying Asset Allocation: 75% QQQI (NEOS 纳斯达克 100 高收益 ETF) + 25% NVDY (YieldMax NVDA 期权收益策略 ETF)。

Yield Strategy: 底层 ETF 实施卖出备兑看涨期权 (Covered Call) 策略，旨在通过捕获市场波动性产生持续的现金流。

Expected Return: Target annualized net return of 13-16% (net of fees).

Dividend Frequency: Weekly payout.

1.1.1 Underlying ETF Basic Information

QQQI — NEOS 纳斯达克 100® 高收益 ETF

基金参数	Details
发行机构	NEOS Investments
成立日期	2024 年 1 月 29 日
上市交易所	NASDAQ
底层致敬	纳斯达克 100® 指数
期权策略	主动管理型数据驱动备兑认购 (NDX 指数期权, Section 1256)
派息频率	Monthly
费用率	0.68% p.a.
管理规模 (截至 2026 年 5 月)	Approx. \$11 Billion (~\$11B)
Annualized Dividend Yield	Approx. 14.32% (As of Mar 31, 2026)

NVDY — YieldMax™ NVDA 期权收益策略 ETF

基金参数	Details
发行机构	YieldMax ETFs (Tidal Financial Group)
成立日期	2023 年 5 月 10 日
底层致敬	英伟达 (NVDA)
期权策略	主动管理型Weekly NVDA 认购价差期权
派息频率	Weekly
费用率	0.99% p.a.
管理规模 (截至 2026 年 4 月)	约 14.4 亿美元
Annualized Dividend Yield	Approx. 52.17% (As of Apr 22, 2026)

1.2 rAIX (rAI Max) : 增强型结构化收益 RWA 代币

rAIX (rAI Max)

采用双引擎驱动模型，结合了科技股期权收益与全球存储芯片超级周期的资本增值潜力，提供极高的总回报预期。

Underlying Asset Allocation: 50% DRAM (Roundhill Memory ETF) + 35% NVDY + 15% QQQI。

Yield Strategy: DRAM tracks global memory chip giants to capture supercycle explosive growth; NVDY and QQQI provide robust dividend payouts through high option premiums via covered call strategies.

Expected Return: 预期净总回报 62% (包含资本增值与约 14.2% 的净分红率)。

Dividend Frequency: Weekly payout.

1.2.1 Underlying ETF Basic Information

DRAM — Roundhill Memory ETF

基金参数	Details
发行机构	Roundhill Investments
成立日期	2026 年 4 月 2 日
Product定位	全球首只纯存储芯片 ETF
核心持仓	SK 海力士、美光科技、三星电子 (合计权重约 73%)
市场覆盖率	对应全球存储市场超过 95% 的份额
管理规模 (成立 43 个交易日内)	突破 100 亿美元 (美股 ETF 史上最快资产增长纪录)
成立以来涨幅	约 95-99% (截至 2026 年 5 月)
派息频率	No dividend (Pure capital appreciation)

NVDY — YieldMax™ NVDA 期权收益策略 ETF (35%)

基金参数	Details
发行机构	YieldMax ETFs (Tidal Financial Group)
成立日期	2023 年 5 月 10 日
底层致敬	英伟达 (NVDA)
期权策略	主动管理型Weekly NVDA 认购价差期权
派息频率	Weekly (35% in rAIX)
费用率	0.99% p.a.
管理规模 (截至 2026 年 4 月)	约 14.4 亿美元
Annualized Dividend Yield	Approx. 52.17% (As of Apr 22, 2026)

QQQI — NEOS 纳斯达克 100® 高收益 ETF (15%)

基金参数	Details
发行机构	NEOS Investments
成立日期	2024 年 1 月 29 日
上市交易所	NASDAQ
底层致敬	纳斯达克 100® 指数
期权策略	主动管理型数据驱动备兑认购 (NDX 指数期权, Section 1256)
派息频率	Monthly (15% in rAIX)
费用率	0.68% p.a.
管理规模 (截至 2026 年 5 月)	Approx. \$11 Billion (~\$11B)
Annualized Dividend Yield	Approx. 14.32% (As of Mar 31, 2026)

1.3 rSTR: MicroStrategy Perpetual Preferred Stock Token (Dividend RWA Token)

rSTR is a structured preferred equity token based on MicroStrategy (MSTR) stock, providing investors with fixed high dividend yields while isolating the downside risk of MSTR through overcollateralization.

Underlying Asset Allocation: 100% corresponds to MSTR Cumulative Perpetual Preferred Stock.

Yield Strategy: Relies on MSTR's Bitcoin reserves (reserve coverage ratio of approx. 6x) to provide ample safety cushion and solvency guarantee, with dividend priority over common stock.

Expected Return: Target annualized distribution rate 11.5% (pre-fee).

Dividend Frequency: Monthly payout.

1.3.1 Underlying Preferred Stock Basic Information

STRC — Strategy Inc. Perpetual Preferred Stock (formerly MicroStrategy)

Security Parameters	Details
Issuer	Strategy Inc. (formerly MicroStrategy, Nasdaq listed)
Security Type	Cumulative Perpetual Preferred Stock
Par Value Peg	\$100/share, 30-day volatility only 3%
Annualized Dividend Yield	11.5% (Monthly cash dividend)
Dividend Priority	Senior to common stock and all other series of preferred stock (STRK, STRD)
Issued Scale	Over \$13.5 Billion (Average daily trading volume \$375 Million)
Dividend Record	23 consecutive on-time and full dividend payouts since IPO in July 2025, totaling over \$693.5M
BTC Reserve Endorsement	Strategy holds 818,334 BTC (3.88% of global supply), dividend coverage multiple 4.3x
Institutional Custodians	Morgan Stanley, Goldman Sachs, Citi have all integrated trading, custody, and lending services

02

智能合约地址与金库信息

RWAlpha 的Product已部署于 BNB Chain 和 Mantle Network。以下为各Product的金库智能合约地址，所有链上操作均公开透明，可供实时审计。

Product名称	金库代码	BNB Chain 主网合约地址	Mantle Network 主网合约地址
rAI	rAI	0x5D08B15c4241Cc0C147c65a562f0a5f9C5f9ca04	0xA71262f2c790AB98D14a36e6c533B5b304dEb69c
rAIX	rAIX	0x87837F2466cdce52ffDC0793272075e3D2184f6C	0xc1Ab1a85e1C88b8F6D4c8adc2218960f6efA863b
rSTR	rSTR	0x375AFE5eB0924FA507a32D274692828442441E4E	0xaEbC6191684b0838E46c0113b5741B5f96070028

03

资产隔离与托管架构

To ensure asset liquidity, independence of yield distribution, and financial transparency, RWAlpha adopts a fiduciary management system that separates principal and yield, applicable to rAI, rAIX, and rSTR:

3.1 本金金库 (Principal Vault)

- 功能定义：专项持有底层 ETF 或股票头寸，对应代币的基础资产价值。
- 所有权证明：底层资产由 Onchain GP Limited 在 MOOMOO（富途证券）等持牌经纪账户中持有。
- 审计与透明度：链上映射资产采用 Fireblocks
- 机构级多方安全计算（MPC）技术进行托管，确保实物资产与数字资产之间 1:1 映射。

3.2 收益金库 (Yield Vault)

- 功能定义：专门接收底层资产产生的股息及期权权利金收入。
- 法币兑换：FOMO Pay（新加坡持牌 MPI 机构）负责将美元股息转换为 USDT 进行结算。
- 分配机制：通过智能合约自动执行，收益以稳定币（如 USDT）形式定期分配给代币持有者。

3.3 代币化引擎核心机制

RWAlpha 自研代币化引擎采用“合约零余额”设计理念：智能合约仅管理代币铸造/销毁/记账，不托管任何资金。用户 USDT 进入合约后立刻转至 Fireblocks Vault，实现资金与合约的完全隔离。

Core Features	Detailed Description
Broker API Direct Connection	ETF holding shares and closing prices are automatically retrieved via MOOMOO API. Each rToken corresponds to real ETF underlying positions. Full-chain automated operations, eliminating manual Excel reconciliation.
Three-Wallet Isolation	Fireblocks Vault contains three independent wallets: Inbound / Outbound / Yield, corresponding to subscription funds, redemption funds, and yield funds respectively, achieving fully auditable fund flows.
Three-Layer Approval Chain	Maker 2FA Verification → Checker 2FA Verification → Fireblocks 2/2 Multisig Broadcast. All on-chain fund operations require two different natural persons to complete 2FA verification respectively, then broadcast via Fireblocks MPC cryptographic multisig, aligning with traditional finance 'Initiate-Review-Approve' processes.
Vault Partner Co-Management	Vault 2/2 multisig permissions are held jointly by RWAlpha and Partner. Neither party can independently move funds, maximizing client asset security.
Smart Dividend Engine	Weighted distribution based on user's valid holdings × holding days, automatically deducting WHT 30% + management fee accrual. Dual-metric APY: current week real-time value and 4-week rolling average.
Multi-Chain Support	Simultaneously launched on BNB Chain and Mantle Network, supporting multi-vault parallel operations, scalable to more public chains in the future.

04

Subscription, Redemption, and Payout Process

4.1 申购（铸造代币）

- 用户存入 USDT → RWAlpha 通过 FOMO Pay 进行兑换 → 通过 MOOMOO 购买底层资产 → 在链上铸造等额代币 → 发送代币至用户的 Web3 钱包
- 结算时间：整个过程大约需要 T+1 个工作日（周末 T+3）。

4.2 赎回代币

用户提交赎回请求，智能合约锁定代币 → 通过 MOOMOO 出售相应的底层资产 → RWAlpha 通过 FOMO Pay 兑换为稳定币 → USDT 发送到用户钱包，同时销毁代币

结算时间：整个过程大约需要 T+3 个工作日（周末 T+5）。

4.3 Payout Process

底层资产分配收益 → MOOMOO 将收益转入 RWAlpha 账户 → RWAlpha 通过 FOMO Pay 将收益兑换为 USDT → 智能合约根据持有量计算每位用户的比例份额 → 合约自动将分配发送至用户账户

到账时间：用户提交提现申请后 T+1 到达用户关联的钱包。

05

合规与机构框架

RWAAlpha (Onchain GP Limited, BVI 实体) 是 DMZ Finance (DMZ Fintech Pte. Ltd., 新加坡实体) 的 100% 全资子公司。双方通过与持牌机构建立协作网络, 共同构建了合规运营闭环:

[illegible]

06

Fee Structure

Product	Management Fee	Subscription Fee	Redemption Fee
rAI	2% p.a.	Waived	Waived

rAIX	2% p.a.	Waived	Waived
rSTR	0.5% p.a.	Waived	Waived

07

风险因素
