Mutual Funds Act (2025) s.4(3)
Cayman Islands
Fund Factsheet | June 2026

OVERVIEW

RWAlpha Index Prime SP is a tokenised, income-oriented fund-of-funds registered with CIMA under the Mutual Funds Act (2025). It invests across a diversified portfolio of covered-call and income ETFs themed on the artificial intelligence (AI) value chain, seeking regular income together with long-term capital appreciation.

Performance fee	Nil	Nil
Distributions	At Directors' discretion (USD)	At Directors' discretion (USD)

Classes rSTR, ENG and SI are pre-reserved within the offering document and are not currently active.

INVESTMENT STRATEGY

- Income ETFs convert the volatility of their underlying assets into periodic cash flow through covered-call and dividend-enhancement strategies; the Fund brings this institutional framework on-chain.
- The theme spans the full AI value chain — compute and semiconductors, models and algorithms, and AI storage and infrastructure — where the AI super-cycle sustains the elevated volatility that drives covered-call income.
- Fund Tokens are permissioned Information Tokens, issued to KYC/AML-verified whitelisted wallets only, and are **non-transferable at launch**. Legal title is determined by the Register of Members maintained by the Administrator.
